

Metso Power Now Stocks and Fabricates Boiler Tubing at their U.S. Facilities

Charlotte, NC—March 2012— Metso Power, a front-runner in fluidized bed combustion systems, is now stocking boiler tubing and membrane bar in a wide range of material grades and sizes. The bulk of its strategic inventory will be located in Metso’s Lancaster, SC Service Center which also offers full service OEM quality pressure part fabrication to meet its customer’s emergency needs on a 24/7 basis.

Stocking a full inventory of tubing in its U.S. locations enables Metso to deliver timely planned shipments while also being able to deliver tubing for emergency situations throughout North America. Unlike most tubing distributors, customers also have the added benefit of utilizing Metso’s technology and engineering capabilities for more complex pressure parts deliveries.

“Stocking a full inventory of tubing in our Service Centers allows Metso to turn orders around quickly for our customers in North America,” said Jim Ulrich, Product Manager for Straight Tubing at Metso Power. “As a full service OEM, we have the ability to fabricate tubing to spec and fulfill large quantity orders. We understand our customer’s boiler tube requirements and have chosen our domestic and European partners with these requirements in mind.”

Metso boasts the largest inventory of composite stainless steel tubing in North America. Primarily used in the pulp and paper industry, composite tubing is always in stock and available along with an extensive cross-section of carbon and alloy tubing that is continuing to grow. Customers can also purchase membrane bar in custom sizes using Metso’s specialized bar sizing equipment. Metso uses a careful selection process in building its stocking inventory which includes close collaboration with customers and stocking those items which are required to meet their future needs.

In addition to boiler tubing and pressure part manufacturing, Metso’s Fairmont, WV Service Center is the global leader in tube shield manufacturing. With an extensive inventory of stainless sheet material, Metso offers a full range of custom straight, curved and 370° style tube shields with a variety of clip attachments.

Metso is a global supplier of technology and services to customers in the process industries including: mining; construction; pulp and paper; power; and oil and gas. Our 30,000 professionals based in over 50 countries deliver sustainability and profitability to customers worldwide. Expect results.
